

Ammon Bundy, the Caravan, and Patriot Race Politics - It's Going Down

Another look at the multi-faceted reality of the populist right:

"Ever since the Patriot movement first exploded in the mid 1990s with the widespread formation of "citizen militias," many critics have treated it as essentially a toned-down version of white nationalism. It's always been more accurate to say that the Patriot movement is a political hybrid, where white nationalism has interacted and cross-fertilized with a number of other right-wing ideological forces. It has always encompassed a range of positions on race. That's part of why it's attracted a much bigger following and may ultimately be more dangerous than the white nationalist movement itself."

"Three Way Fight"
