

Slash and Burn | BLM War on P-J Woodlands - Sierra Club

The BLM war on Piñon-Juniper (P-J) forests to benefit livestock grazing, the main topic of the article linked here, can serve as a template for its pro-beef war on other woody-species ecosystems -- most notably, for those of us in the Southwest, Mesquite woodlands.

Like many wars, they are touted by big-money propaganda machines and justified with at best questionable scientific assertions and outright pseudo-science backed by biased, often racist, economic assumptions and narrow political goals - always at the expense of the environment.
