

Ladd ranch being cropdusted this morning (17 June 2015)

[http://www.bensonnews-sun.com/news/article\\_e84c0c44-963d-11e6-99bc-ffd3fd9f4ba4.html](http://www.bensonnews-sun.com/news/article_e84c0c44-963d-11e6-99bc-ffd3fd9f4ba4.html)

Interesting that they reference both clearing to see migrants, and herbicide in the water— which latter wd be a clear violation of label instructions (a federal offense, not to mention environmental harm) for most herbicides used for this purpose.

Hopefully some one can find time to find out what chemicals were actually used.

And do note that one of the places they'd like to get rid of the mesquite is Greenbush Draw.

just heard that this morning the Ladd ranch is being cropdusted (with tebuthiuron?) evidently to kill the mesquite, overtly to convert the bosqueland to grass
