

Short sighted boosters real terrorists - LTE *Sierra Vista Herald* (May 9, 1999)

Lately we heard, from the usual quarters, a lot [of] political cant about Earth Day terrorists, wackos and Communists, as if seeking legal redress through the courts is a violent act, and holding that the public interest is higher than private profit is not the stuff democracy is made of.

The real eco-terrorists hereabouts are short-sighted boosters and blowhards and those they encourage to blast and gouge, cut and dessicate, and otherwise abuse the living earth, ignorant or in disdain of the simple ecological precept that all is connected to each with no regard for the common sense concept of ecological carrying capacity.
