

Dogtown

Oyez our ayes have dots with dogs addressed
to them and dogs with ears and dogs without.

She says they say she's into black magic
and threaten to kill her because she won't commit
her son they say raped a neighbor's daughter
and him retarded like that with a history
of little girls. And she has to they say

clean up her act with the oils too, tone down
the names or something. *Lustmaster Body Oil*
for instance (and *Priapus Oil* won't do
either she says.) and one of the Main Street
shopkeepers has told her she's really not
a very spiritual person and dropped her line.

Every dog may have his day many
in heaven's choir would rather their balls were back.
