

(2025 November 03) Malchik - Everlasting Mythologies: Anglo-Saxon Identity (On the Commons)

[You who get my mailings might normally expect to see the Antonia Malchik essay attached here as a subtitle in one of my Enviropolitics gathers. I'm sending it as a stand-alone piece to draw your attention to it as an outstanding coherent and succinct statement of one of the most disgusting, and potentially fatal, pathologies of our America, the one underpinning the fascistic putsch we are now suffering, the one I and many of you have been in one way or another been struggling against our whole lives. Health and strength (or Ave, since we're referencing Tacitus) to the young taking up the torch! - MG]
